EVChargePress

Find, book and track EV charging — in one app.

User guide and feature overview for drivers and administrators.

Find chargers · Book a slot · Live charging · Plan trips · Track spending · Admin panel

Open the app: **https://ev-charger-press.vercel.app**

Screenshots use fictional sample data (demo stations and amounts) and may differ slightly from your live app. Version: November 2026.

OVERVIEW

Why EVChargePress

EVChargePress helps electric-vehicle drivers find a charger that fits their car, reserve it ahead of time, follow the session live and understand what charging costs them — while giving the operator one place to run the whole network.

For drivers

- Search thousands of stations across India by city, PIN code or name
- See which chargers fit *your* car's connectors
- Book a guaranteed slot with the full price up front
- Watch charging live: power, energy, battery %, cost
- Plan long trips with charging stops and save them
- One history of every session, cost and kWh

For station operators

- Publish charging points, opening hours, rules and prices
- Bookings that never overlap — enforced by the system
- Connect chargers over OCPP 1.6 for live status
- Cancel or move bookings with a reason, no fee
- Verified badge for checked stations

For the business

- Admin dashboard: bookings today, chargers online, reports
- Manage users: add, edit, suspend, delete
- Moderate driver reports and reviews
- Full audit log of every admin change
- Honest data: estimates, manual and simulated values are always labelled

Built on trust. The app never invents live availability, prices or battery data. When a number is an estimate, a manual entry or comes from the demo simulator, it says so on screen.

GETTING STARTED

How to access the app

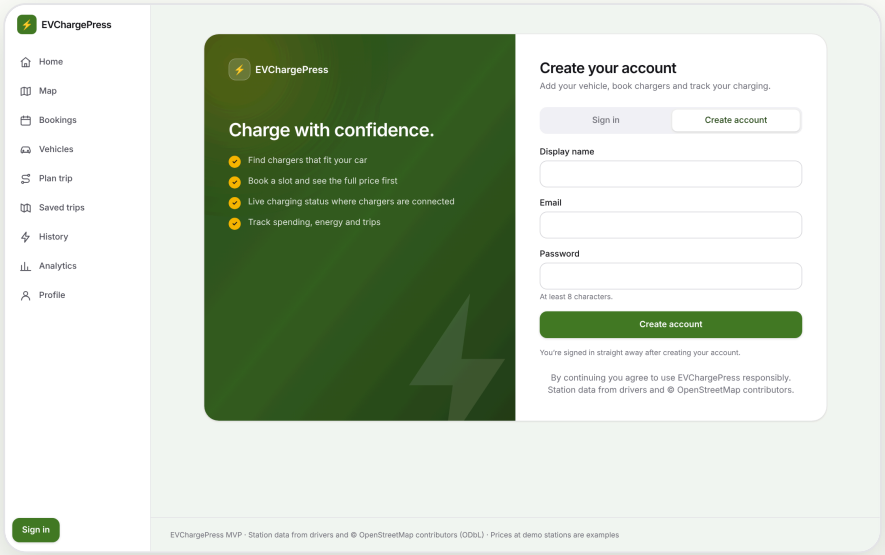

EVChargePress runs in any modern web browser — no download needed.

1. Open **https://ev-charger-press.vercel.app** on your phone or computer.
2. Tap **Sign in** (top right on phones, bottom-left on computers).
3. New here? Choose **Create account**, enter your name, email and a password (8+ characters). You're signed in straight away.
4. Answer the short welcome questions (your vehicle, location preference) — or skip them.
5. Start searching for chargers.

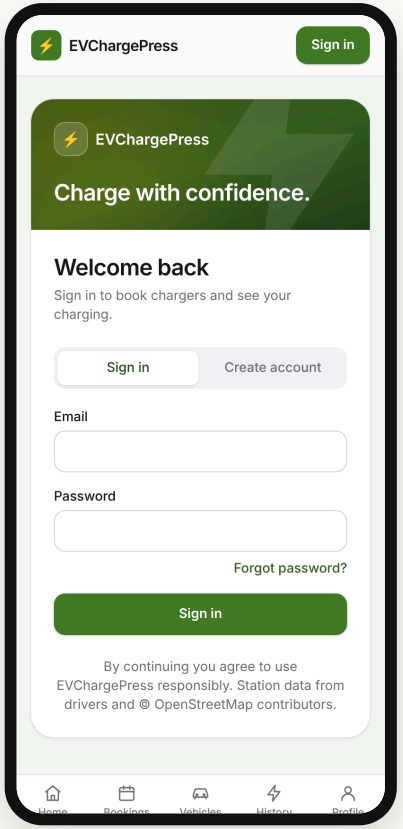

Use it like an app on your phone

- **iPhone (Safari):** Share → *Add to Home Screen*
- **Android (Chrome):** ⋮ menu → *Add to Home screen*

Tip Forgot your password? Use *Forgot password?* on the sign-in page to get a reset link by email. If an admin created your account, you'll be asked to choose your own password at first sign-in.

DRIVERS

Find a charger

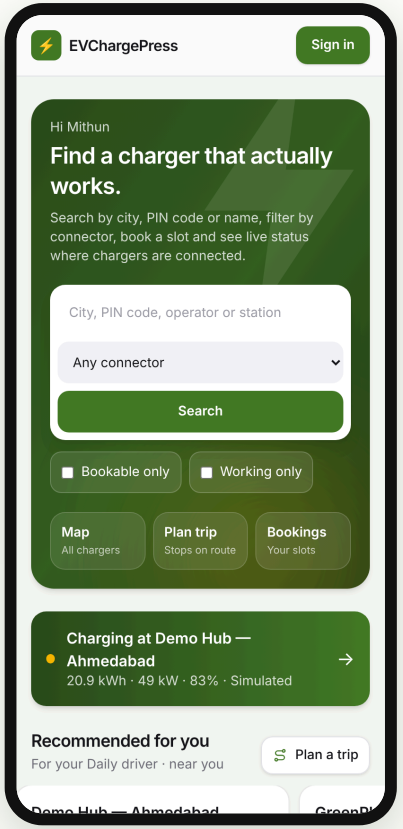

1. Type a **city, PIN code, operator or station name** in the search box.
2. Filter by **connector** (CCS2, Type 2, CHAdeMO, Bharat DC…), **Bookable only** or **Working only**.
3. Tap **Near me** to sort by distance (your location is used only when you allow it).
4. Open the **Map** to browse: green pins can be booked online, grey pins are information only.

What you see on each station card

- Distance, maximum power and connector types
- Latest driver report (working / busy / broken)
- **Recommended for you** — stations that fit your car, are near you or that you use often
- Live free/total charging points where the charger is connected

Home: search, filters and recommendations

DRIVERS

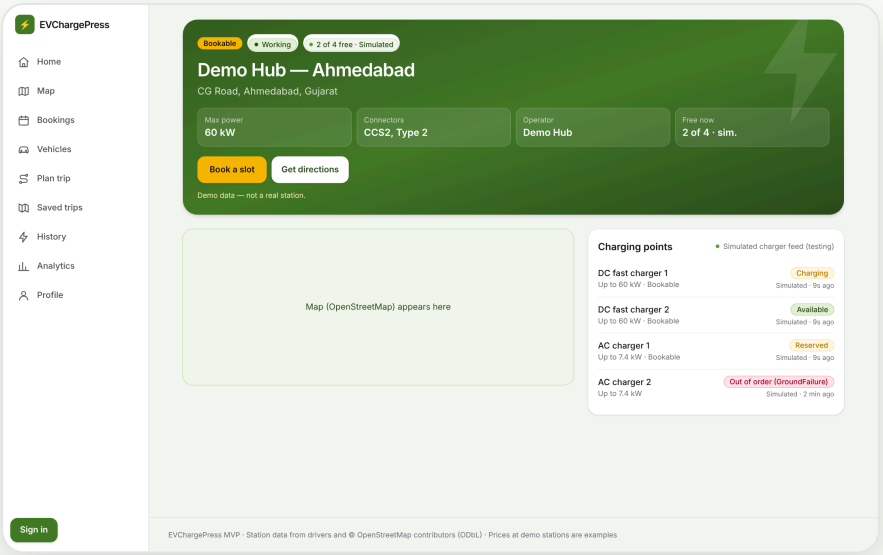

Station details and live status

Each station page brings together everything you need before you drive there.

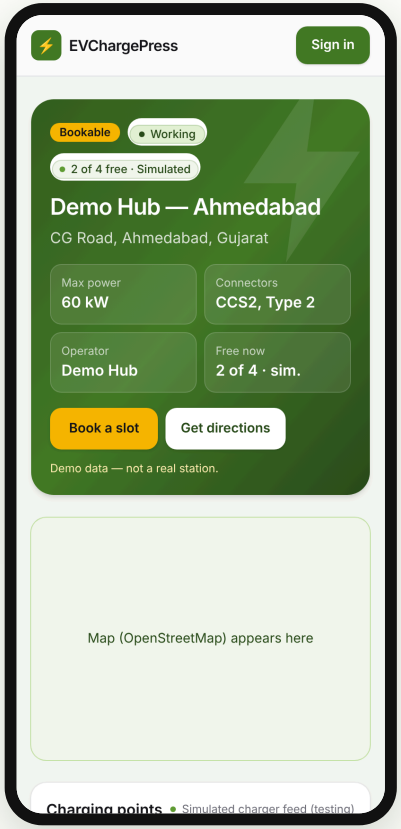

- **Charging points** with live status: available, charging, reserved or out of order — and how fresh that status is
- Connectors, power, operator, access, opening hours and price
- **Get directions** opens your maps app
- **Report status**: tell other drivers if a charger is working, busy or broken
- Recent reports from other drivers

Badges explained

- **Bookable** — you can reserve a slot online
- **Verified** — checked by EVChargePress
- **Simulated** — data from the demo charger simulator, not a real charger
- **OpenStreetMap** — community map data, information only

Station page with live charging points

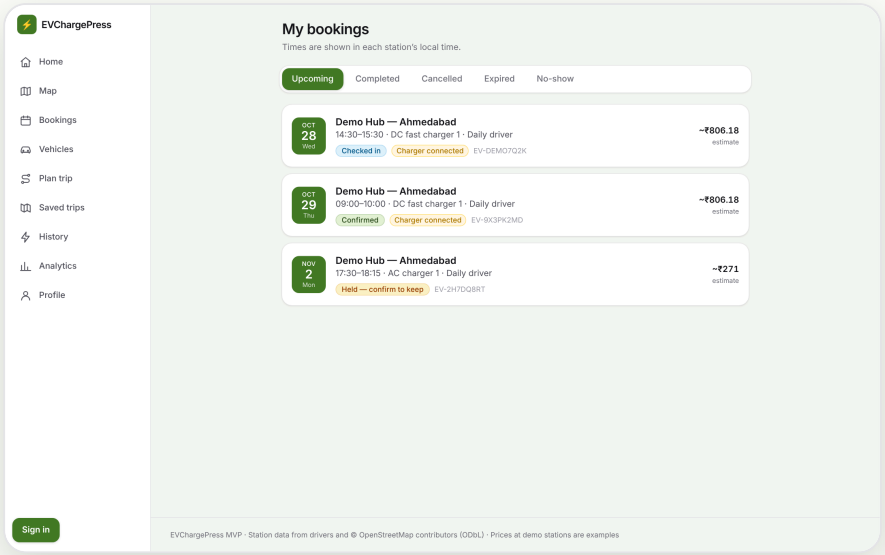

DRIVERS

Book a slot

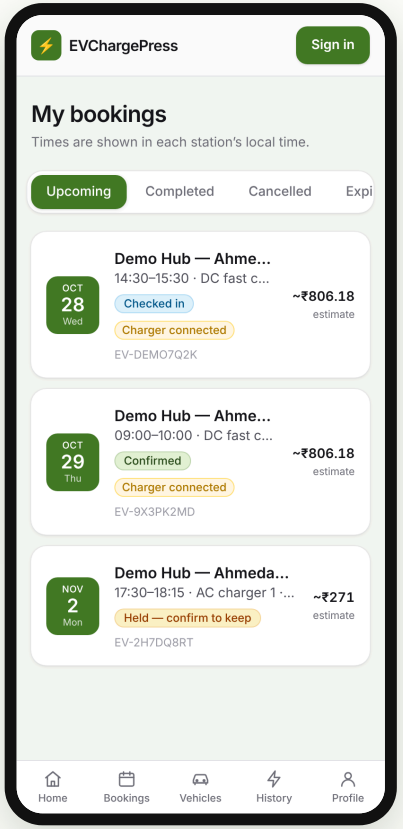

1. On a bookable station, tap **Book a slot**.
2. Pick your **vehicle** — only compatible charging points are offered.
3. Choose a **date, start time and duration** from the available slots.
4. Check the price breakdown: reservation fee plus estimated charging cost (energy, time, tax).
5. Tap **Confirm**. Your slot is held for a few minutes while you confirm, then it's yours.

Managing bookings

- **Bookings** tab: Upcoming, Completed, Cancelled, No-show
- Cancel free of charge until the free-cancellation time shown on the booking
- **Check in** when you arrive (from 15 minutes before the start)
- Each booking shows its reference (e.g. EV-7KQ2...), timeline and price snapshot

My bookings

Tip No two drivers can ever hold the same charging point at the same time — the system guarantees it.

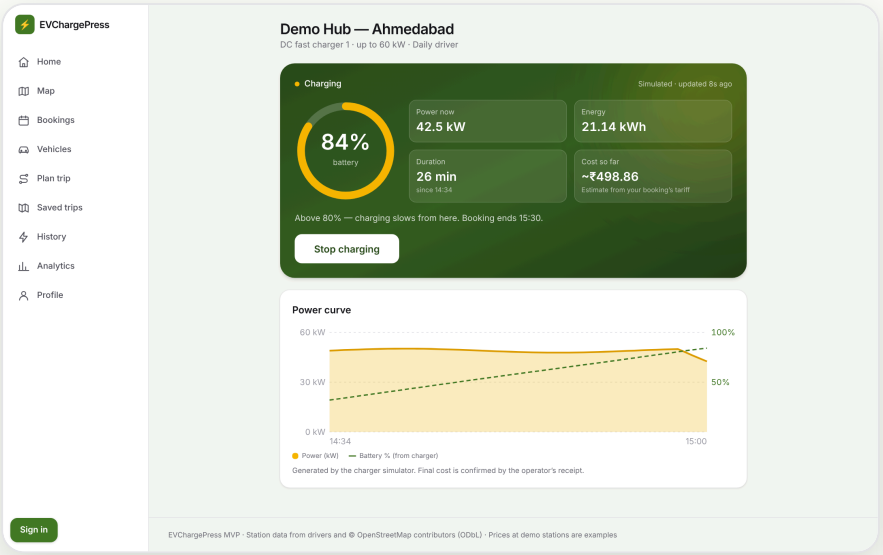

DRIVERS

Live charging

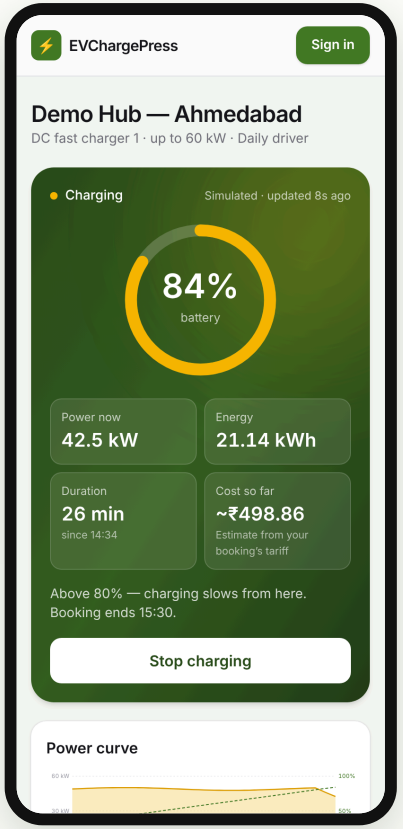

When the charger is connected, start and follow your session from your phone.

1. Open your booking at the station and tap **Start charging** (after check-in).
2. Watch **power (kW)**, **energy (kWh)**, **battery %**, duration and cost so far update live.
3. The **power curve** shows how charging slows as the battery fills.
4. Tap **Stop charging** when you're done — the session is saved to your history.

- Battery % shown here comes from the charger, when it reports it
- Cost so far is an estimate from your booking's tariff; the operator's receipt is final
- A banner on the home page shows any session in progress

Live charging session

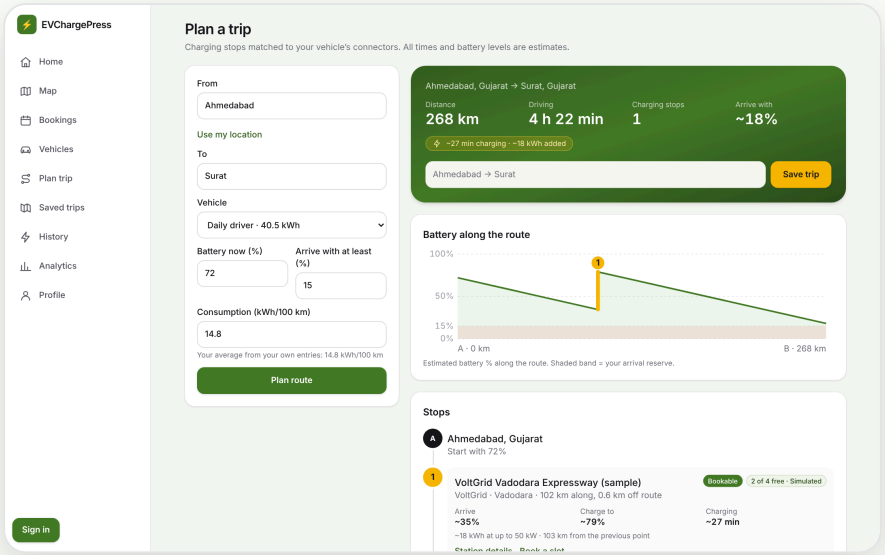

DRIVERS

Plan a trip

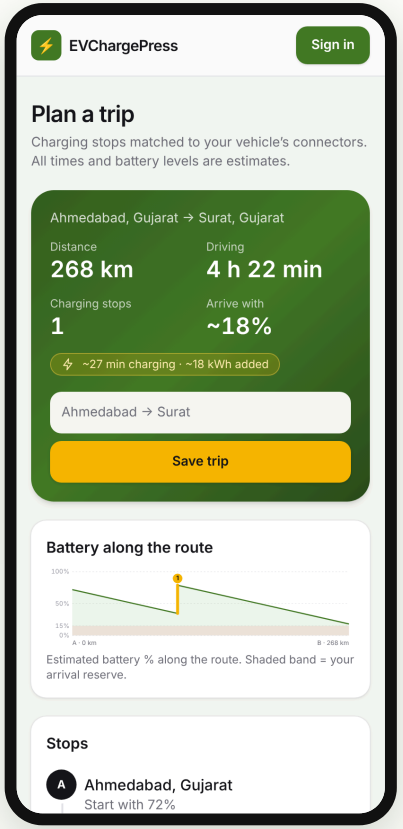

1. Open **Plan trip** and enter where you start and where you're going.
2. Choose your **vehicle**, current **battery %** and the minimum % you want on arrival.
3. Tap **Plan route**.
4. See distance, driving time, number of charging stops and arrival battery.
5. Each stop lists the station, how far off the route it is, battery on arrival/departure and charging time — with **Book a slot** where possible.

Save it for later

Give the trip a name and tap **Save trip**. Every charging station along the route is saved with it.

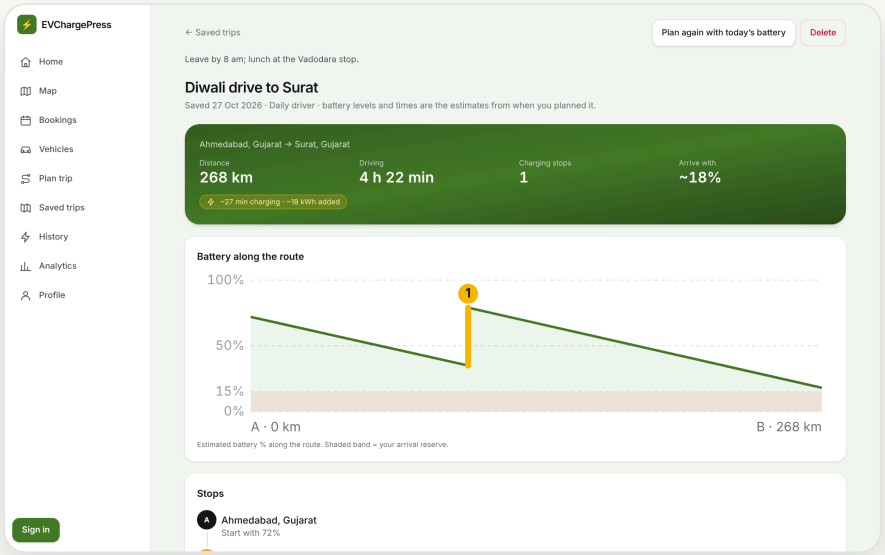

Trip planner with battery chart and stops

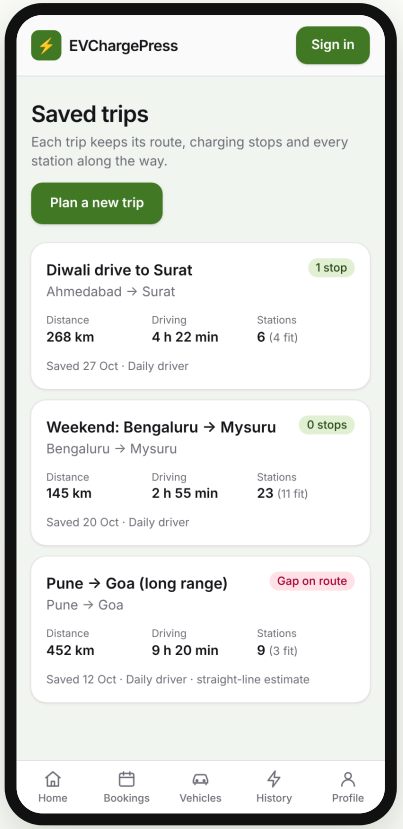

DRIVERS

Saved trips

- **Saved trips** lists every trip you've planned
- Open one to see the route, battery chart, planned stops and *all* stations along the way
- Filter stations: All · Fits my car · Planned stops
- Today's live availability is shown where chargers are connected
- **Plan again with today's battery** re-plans with a new starting %
- **Delete** trips you no longer need

A saved trip

Saved trips list

DRIVERS

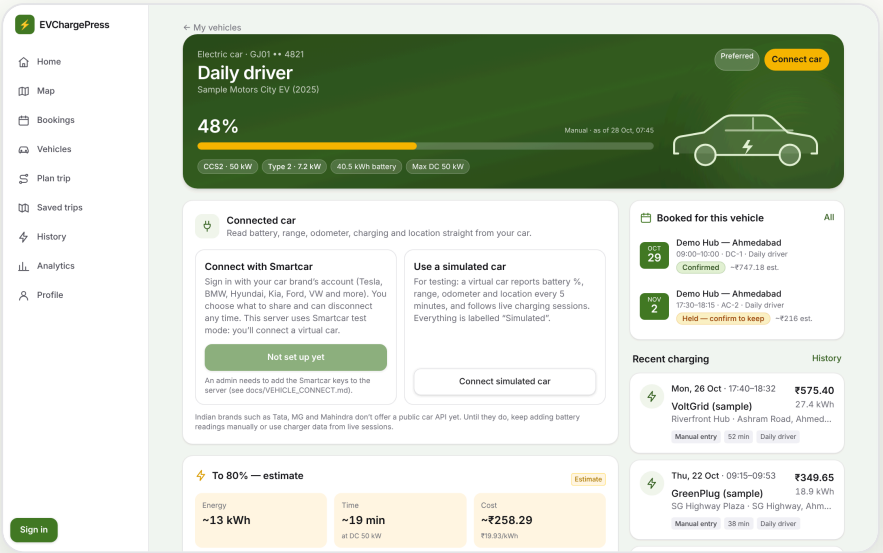

My vehicles and connected car

1. Open **Vehicles** and tap **Add vehicle**: type, make, model, battery size and connectors.
2. Mark your main vehicle as **Preferred** — it's used for search, booking and trips.
3. Log battery readings manually, or tap **Connect car**.

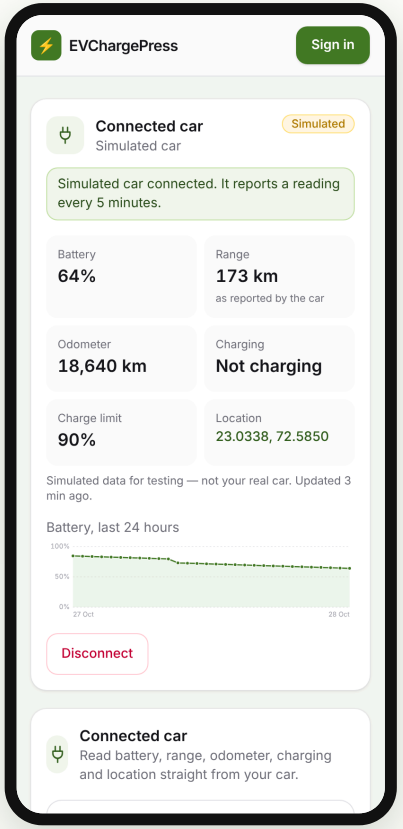

Connected car

- **Connect with Smartcar** (when enabled): sign in with your car brand to share battery, range, odometer, charging state and location
- **Use a simulated car**: a virtual car for testing — every value is labelled Simulated
- Disconnect any time

The vehicle page also shows upcoming bookings, recent charging and an estimate of time and cost to charge to 80%.

Vehicle dashboard

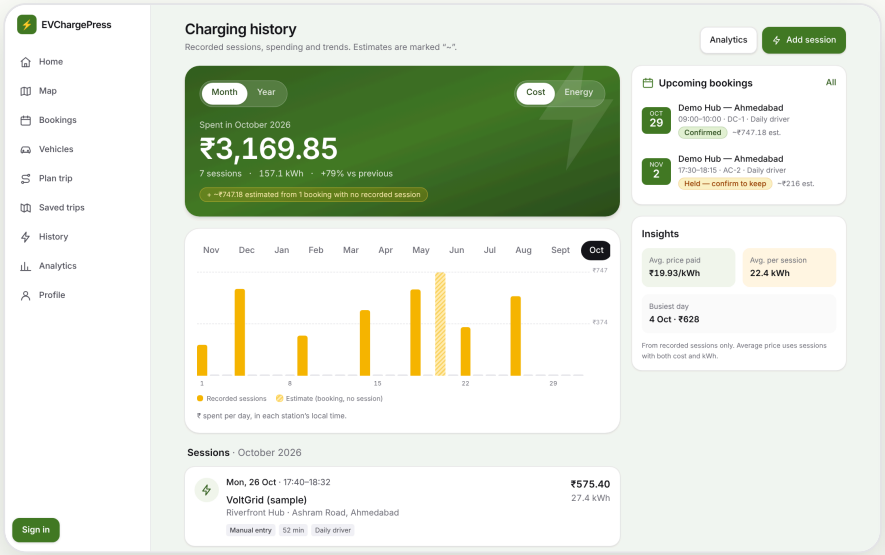

Connect a car

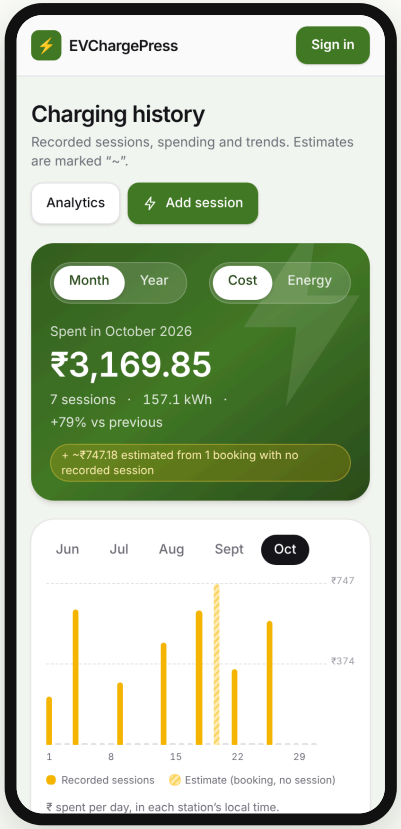

DRIVERS

Charging history

- Month and year views of **spending** or **energy**
- Comparison with the previous period
- Every session: station, date, kWh, cost, duration and vehicle
- Add a past session manually from a receipt
- Bars from booking estimates are striped so you can tell them from real sessions

Charging history

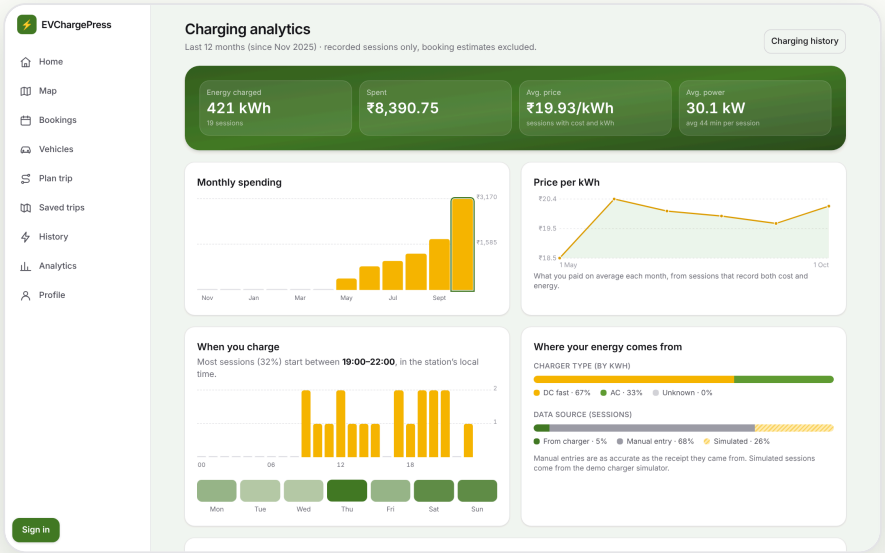

DRIVERS

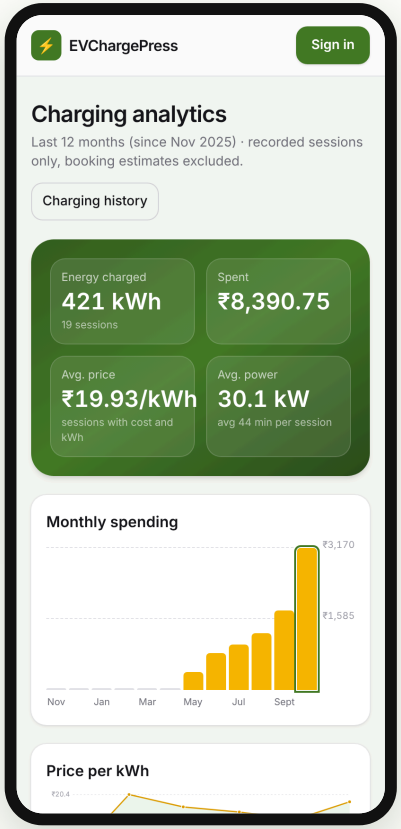

Charging analytics

A 12-month picture of how you charge.

- Total energy, spending, average price per kWh and average power
- Monthly spending and price-per-kWh trend
- When you charge: busiest hours and weekdays
- DC fast vs AC share, and where your data comes from (charger, manual, simulated)
- Your top stations by energy

Analytics

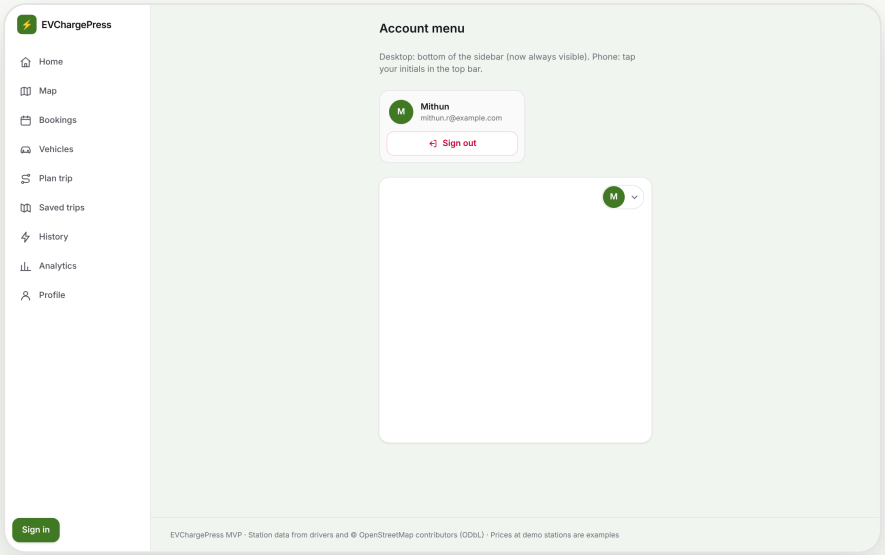

DRIVERS

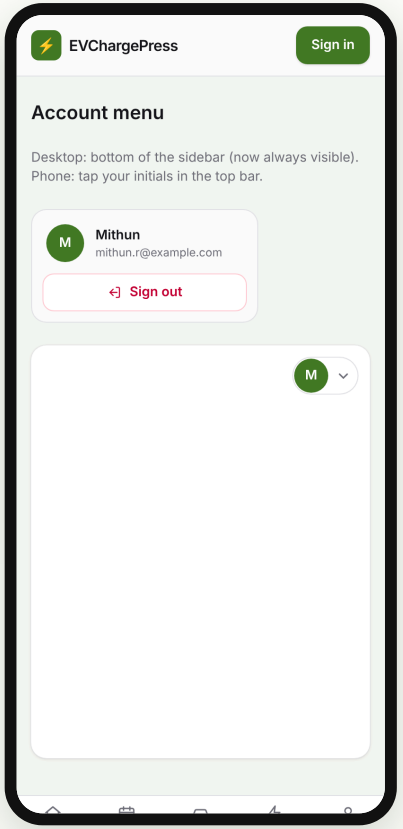

Your account

- **Profile**: name, phone, distance unit, email reminders, location permission
- **Account menu**: on computers at the bottom of the left sidebar; on phones tap your initials (top right)
- **Sign out** is always in the account menu and on My profile
- Request account deletion from My profile

Tip Admins also see an **Admin panel** link in the account menu and an Admin section in the sidebar.

Account menu

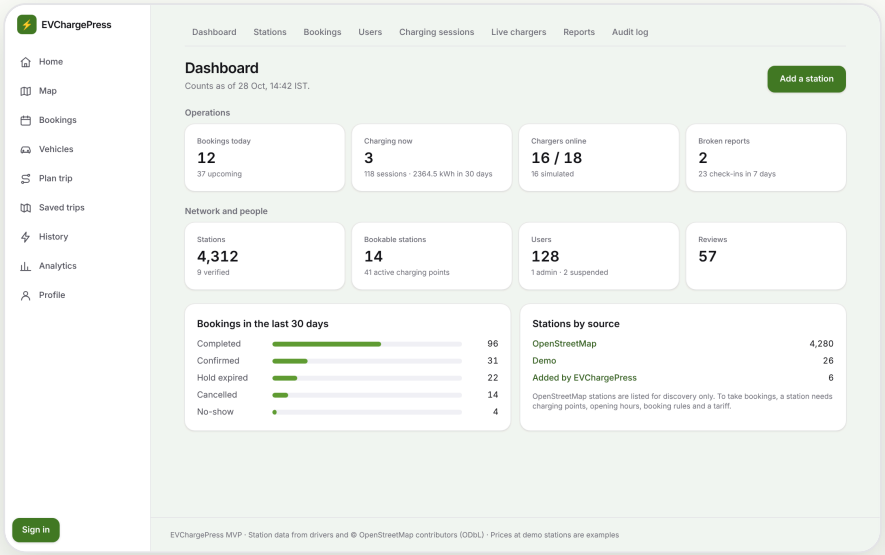

ADMINISTRATORS

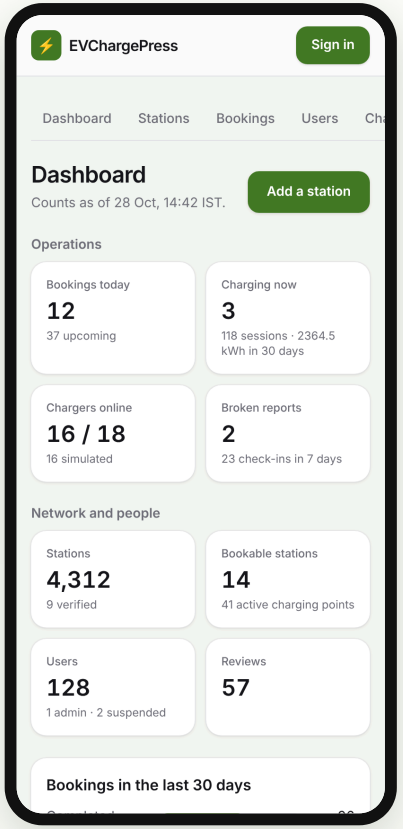

Admin panel — dashboard

Admins run the whole network from **/admin**. Only accounts with the admin role can open it.

- **Operations**: bookings today, cars charging now, chargers online, broken reports
- **Network and people**: stations, bookable stations, users, reviews
- Bookings by status for the last 30 days
- Sections: Stations · Bookings · Users · Charging sessions · Live chargers · Reports · Audit log

Admin dashboard

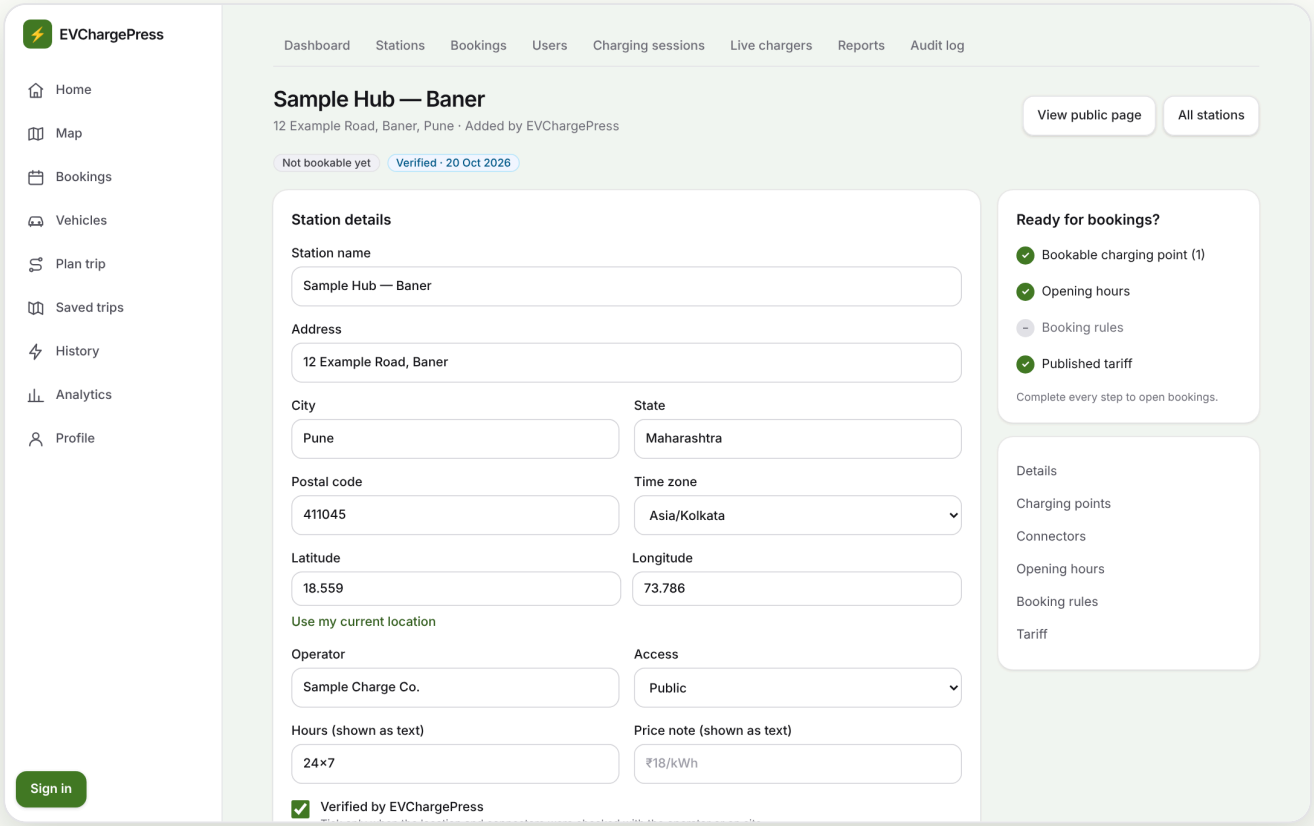

ADMINISTRATORS

Admin — stations and pricing

1. **Stations → Add a station**: name, address, location (or *Use my current location*) and connectors.
2. Add **charging points** and tick *Bookable*; link a real charger (OCPP) for live status.
3. Set **opening hours** and **booking rules** (slot length, buffer, cancellation window, no-show grace).
4. Publish a **tariff**: per kWh, per minute, session fee, reservation fee, idle fee and tax.
5. When the **Ready for bookings?** checklist is all green, drivers can book.

- Mark stations **Verified**
- New tariffs apply to new bookings; existing bookings keep their quoted price
- Register real chargers in **Live chargers**

Manage a station

ADMINISTRATORS

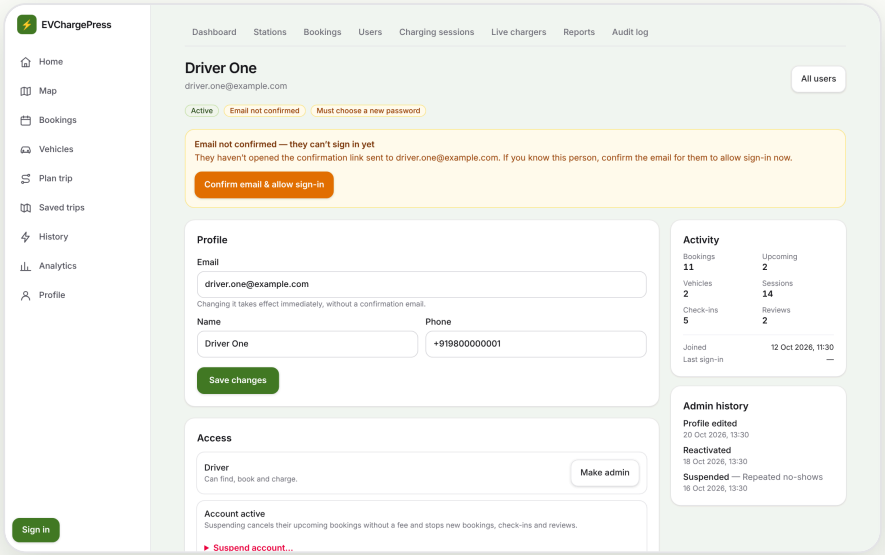

Admin — users, bookings and moderation

Users

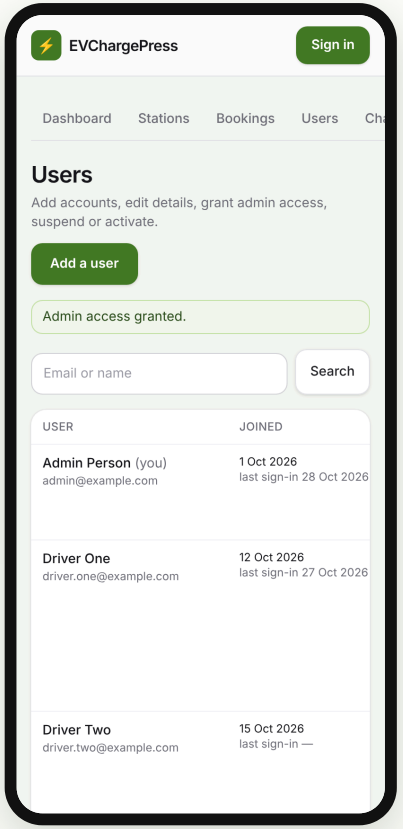

- **Add a user** with a password (or generate one); they choose their own at first sign-in
- Edit name, phone and email; **Make admin** / remove admin
- **Confirm email & allow sign-in** for accounts still waiting for confirmation
- **Suspend** (upcoming bookings cancelled free) or **Activate**
- **Delete account** permanently — type the email to confirm

Bookings, sessions and reports

- See every booking; cancel with a reason and no fee
- All charging sessions, live and past
- Remove spam check-ins or reviews
- **Audit log** records every admin change

GOOD TO KNOW

Labels, questions and support

What the labels mean

Bookable	Reserve a slot online with the full price up front.
Verified	Location and connectors checked by EVChargePress.
Estimate	Calculated from the tariff or your car — not a receipt.
Simulated	From the demo charger or simulated car, for testing.
Manual entry	Typed in by you from a receipt or dashboard.
OpenStreetMap	Community map data, information only — no booking.

Frequently asked

Is my location shared? Only when you tap *Near me* or turn it on in your profile; you can switch it off any time.

What if I arrive late? Check in within the grace period shown on your booking, otherwise it becomes a no-show.

Can I cancel? Yes — free until the time shown on the booking; after that the reservation fee applies.

Why is a station "information only"? Its operator hasn't published bookable charging points, hours and prices yet.

Payments? Online payment is coming next; today the booking shows the price to pay at the station.

Get started: open https://ev-charger-press.vercel.app, create an account, add your vehicle and search for your first charger.
